EDUCATION

MSC COMPUTER
ENGINEERING • 2012-2017

École Supérieure des Ingénieurs de
Beyrouth – USJ | Beirut, Lebanon

TECHNICAL SKILLS

Backend: .NET, C#, Spring, Java

Frontend: Angular, Blazor
Server App, Typescript

Cloud: Azure (IoT Hub, Data Explorer,
Storage, App Service, Application
Insights, Data Factory)

Messaging Platforms: Azure Event
Hub, Azure Service Bus, Kafka

Databases: MS SQL, MongoDB,
SQLite, MySQL

DevOps: Docker, K8s, Bicep, Terraform,
Azure DevOps (Repos & Pipelines)

Tools & Libraries: Git, JIRA,
Confluence, Postman, Polly, Dapper

Architecture & Patterns: Clean
Architecture, CQRS, MVC,
Microservices, EDA,DDD, API Gateway

LANGUAGES

English: Proficient
French: Fluent
Arabic: Fluent

PROFILE

Software engineer with 8+ years of experience designing and delivering scalable solutions in .NET, C#, Angular, and Azure. I've led complex projects end-to-end and take pride in writing clean, maintainable code that solves real problems. Equally invested in mentoring teammates and fostering a collaborative engineering culture. Seeking a Senior Software Developer role where I can drive technical outcomes while helping elevate the team around me.

EXPERIENCE

GENETEC • MONTREAL, CANADA

Software Developer II | Nov 2023 – Present

- Implemented observability using the OpenTelemetry standard with the LGTM stack (Loki, Grafana, Tempo, Mimir) and developed a custom OTEL Collector viewer in Angular 21 with d3.js, providing real-time monitoring, alerting, distributed tracing, and pipeline visibility that enabled the support team to take proactive corrective actions.
- Designed and developed a device fleet management solution and supporting microservices using Blazor Server/.NET 8, following Clean Architecture and CQRS patterns to ensure maintainability, scalability, and clear separation of concerns across services.
- Integrated our backend services with Azure cloud resources such as IoT Hub, Azure Data Explorer (TSDb), Azure Storage Account, Azure Event Hub for event streaming, and Azure Service Bus as a message broker for reliable communication between our microservices.
- Collaborated with product and operations teams to understand enrollment and provisioning requirements for ALPR solutions, translating business needs into actionable technical work
- Led the end-to-end cloud migration of ~20 Azure resources from Azure US Government to Azure Commercial, from digital estate assessment through post-migration validation, leveraging PowerShell scripts to automate repetitive migration tasks.

EMCREY • RIYADH, KSA

Associate Manager | Jan 2022 – Sep 2023

- Played a critical role in the 1st digital bank transformation for our client stc pay in Saudi Arabia, collaborating directly with business analysts and product owners to translate Business Requirements Documents (BRDs) into Functional Specification Documents (FSDs) and technical implementations.
- Architected and led the decomposition of the core banking application from a modular monolith to a microservices architecture, enabling independent deployment, improved scalability, and better fault isolation for a platform serving 10+ million daily active users
- Migrated all legacy .NET Framework services to .NET 6 while integrating with 20+ third-party providers under PCI-DSS compliance requirements.
- Managed the development of a back-office portal using ABP platform with Angular/.NET integrated with 3rd party providers (e.g. Thomson Reuters, Western Union) enabling the Compliance and Marketing teams.
- Mentored and trained team members in C#, .NET, Git, Angular, Scrum, and SQL Server, contributing to improved delivery velocity and code quality across the team.

CERTIFICATIONS & AWARDS

PSM 1 Certification | May 2023

The SCRUM certification allowed me to lead developers in an agile way and mentor them regarding agile methodologies.

CFA Competition Winners | Feb 2020

Captain of the NDU team for the CFA research challenge

Murex Excellence Award | Jul 2017

Best FYP in the Computer Engineering program

Senior Technical Consultant | Sep 2020 – Dec 2021

- Reverse-engineered the core banking application developed in .NET Framework, extracting critical business rules and validations to migrate the system functionalities to newer technologies (e.g., WCF to ASP.NET Core Web Api) and integrate it with new 3rd party providers.
- Authored detailed technical documentation including sequence and class diagrams (PlantUML), C4 architecture models (draw.io), and knowledge-sharing articles on Confluence to support team onboarding and system understanding.

CME OFFSHORE • BEIRUT, LEBANON

Senior Software Engineer | Jan 2020 – Aug 2020

- Led the development of a multi-tenant E-commerce application built with Angular/.NET following MVC architecture to sell proprietary products for major food chains (Subway, McDonald's, Hardee's)
- Built an Angular UI/UX data visualization solution by leveraging ngx-charts and Google Maps libraries for the COVID-19 Control Center project.
- Acted as Scrum Master for an Insurance Portal project, facilitating scrum events and translating business requirements provided by the product owner into actionable tickets.

Software Engineer | Feb 2017 – Jan 2020

- Streamlined CI/CD processes for an ASP.NET MVC application for our supply chain management systems by configuring Azure DevOps Repos and Pipelines.
- Developed a C# WPF lightweight desktop application integrated with Subway POS systems via REST APIs and SQLite.
- Optimized performance of ASP.NET applications using JetBrains tools (dotMemory, dotTrace), and facilitated code migration from SVN to Git.
